DEPARTMENT:	Instrumentation: Telemetry & Meteorology	JOB LEVEL:	(The decisions on the final job level will be commensurated with the experience and know-how of the successful candidate)
PURPOSE	To study, understand, predict and supply atmospheric conditions so that test facilitators and clients can make informed decisions about weather-dependent tests or activities.		

KEY PERFORMANCE AREAS:

- Translate complex weather data, identify patterns, and make accurate forecasts.
- Collect meteorological and climate data and submit reports to the relevant stakeholders.
- Install, maintain, and where possible, repair as well as assist with upgrades of weather observation equipment.
- Process historical met data (surface & upper air).
- Able to explain weather information clearly and concisely.
- Maintain database.
- Staying updated on the latest meteorological methods, technologies and research.
- Balloon soundings.
- Develop new, upgrade, evaluate and maintain existing software.
- Ensure weather instruments are calibrated and functioning properly.
- Supply forecast consultancy service on behalf of the Test Range to OTR clients (local & international).

QUALIFICATIONS AND / EXPERIENCE :

- National Diploma in Meteorology.
- Five to ten years' experience within the Meteorological Environment.
- Do research and climate studies by studying long-term weather patterns and climate variability.
- Computer literate with experience in Microsoft Office (Word, Excel, PowerPoint and Outlook).
- Driving licence (at least a code B).

JOB RELATED PERSONAL ATTRIBUTES

- Analytical, innovative and thorough.
- Highly motivated.
- Teamwork and leadership.
- Ability to work towards deadlines (under pressure).
- When required, be willing to work after hours
- Be able to willingly share information for coordination and reporting purposes. Good communication skills. No history or current back and or knee problems.
- Planning ability.
- No fear of heights.
- Must be medically fit.
