DEPARTMENT:	Instrumentation: Radar	JOB LEVEL:	(Entry Level)
PURPOSE:	To ensure that the radar systems operate accurately and reliably for detection and tracking of objects. This is achieved through the installation, maintenance, repair, and calibration of radar systems used in a variety of settings within OTR.		

KEY PERFORMANCE AREAS:

- Day to day operation of a tracking and marine search Radar.
- Assist with maintenance, fault finding and repair of sub-systems up to component level.
- Assist with preparation and calibration of Radar Systems for Tests.
- Operate the tracking Radars and Marine Search Radar during Tests.
- Deliver data that conforms to Test specification.
- Basic electronic development and upgrades of radar sub-systems on the tracking and marine search radars according to baseline specifications.
- Multi-tasking by assisting in the maintenance and repair operation of all the Radar systems.

QUALIFICATIONS AND /EXPERIENCE:

- National Diploma in Electrical Engineering (light current) or equivalent.
- Experience in the operation and maintenance of radar systems will be considered an advantage.
- At least one year experience in electronic maintenance, design and repair up to component level.
- Computer literate (MS Word and MS Excel).
- At least code B driver's license.

JOB RELATED PERSONAL ATTRIBUTES:

- The incumbent will be working with high voltages, high currents and RF radiation.
- Analytical, innovative and through.
- Excellent work ethics
- Good communication skills.
- Ability to work under pressure.
- Function well within a team.
- Good hand eye coordination.
- Must be fit and healthy with no back or knee problems.

CLOSING DATE: **09 October 2026**
