

QUALITY POLICY

It is the policy of the Denel Aeronautics to provide its customers with world-class solutions from design, development, production and through life support of aircraft and related systems. The company strives for on-time delivery, and ever-improving levels of excellence and customer satisfaction. The company is also a provider of integrated training.

Flight safety technical shall be a prime consideration at all times during design, development and manufacturing.

It is Denel Aeronautics' commitment to comply with customer, applicable statutory and regulatory requirements and those considered necessary by the organisation, as set down within the quality management system.

Denel Aeronautics is dedicated to the continual improvement of its products, services, and the company quality management system. This is formalised through process control, employee empowerment and the application of human factor principles and management commitment. Top Management shall ensure that the policy provides a framework for establishing and reviewing quality objectives on a regular basis and quality objectives are communicated and updated, as appropriate.

Management shall ensure that this Quality Policy statement is communicated to all in the organisation and is fully understood and adhered to.

This Policy will be available to relevant interested parties.

Michael L. Kgobe
